Abstract (en)
[origin: DE19964092A1] The cutting tool consists of a plate (1) with lengthwise bend in the form of two arms (2,3) and an intermediate bridge piece (4). One arm (2) is fixed to the oscillating implement (5), and the other, opposite arm (3) acts as cutter-blade. The plate is shaped like a W with rounded corners. An intermediate piece of the W-shaped plate is inserted behind the end side of the windscreen (10) , enabling the cutter-blade to be placed at least on one part of the V-part of the W-shaped plate.
