Abstract (en)

[origin: EP1213212A1] The carriage for handling concrete tunnel sections has an endless track (20) with links formed as plates (24) which partially extends between the carriage rollers (16) and the ground (18). The track can be guided on sprockets (28), at least one of which can be adjustable to allow adjustment of the track tension. The track can be of steel and may be powered by a drive attached to the carriage.
