Abstract (en)

The invention relates to a roof construction that can be dismantled and has two pairs of columns, two hollow beams, which are located some distance apart and each of which is supported by two columns, and decking sheets (20, 21) supported on the beams, wherein at least one hollow beam (4, 4', 4'', 4''') is provided with a water inlet and a water outlet (17, 31, 32) located above the column, wherein the decking sheets (20, 21) are positioned above the water inlet of the beam (4, 4', 4'', 4''') with a gap (7) between them and wherein at least one column (5, 6) is provided with a tank (9) which functions in conjunction with the water outlet of the beam. As a result the roof construction can be assembled and dismantled in a simple manner. Moreover, with this arrangement new rubber seals do not have to be used every time. <IMAGE>
