Abstract (en)
[origin: EP1213483A1] The diffuser stage comprises concentric external and internal (4) flanges connected to each other by a series of fixed blades (60,61,62). The interior flange has slots (42,42') for the passage of one end (51,51') of the blades. The blades have at this end a second cut-out (52,52') for the passage of an elastic retention and rigidifying piece (100) in order to hold them in pairs.
