Abstract (en)

[origin: FR2817650A1] Insulated protection uses first (1) and second (4) protective cover sleeves (2,5) which extend to form cover plates (3,6). Part of the first protective cover (2) is fitted over a bus bar (7) and the other part (5) is fitted over the cable termination (8) that connects to the bus bar. The angle between protective sleeves and cover plates can be altered to allow different angles of cable entry.
