Abstract (en)

[origin: DE19946020A1] The invention relates to a rocker switch for one two-stage actuating stroke, especially in the form of a window control switch for a motor vehicle. The inventive rocker switch comprises a rocker button (2) which is mounted in a housing (1). An actuating plate (11) for acting on switching contacts (17, 18, 19) that are connected to terminal contacts (27) is associated with said rocker button. A switching contact (17, 19) is allocated to the actuating stroke of the first stage (29) in each direction (28, 33), respectively and a common switching contact (18) is allocated to the actuating stroke of the second stage (31) in each direction (28, 33), respectively.
