Abstract (en)
[origin: EP1214960A2] The building block system (10) consists of dimensionally stable, especially interlocking bodies (11,12). The second body is detachably fixed to the first body along different directions by means of a separate connecting element (13) cooperating with the two bodies by means of gripper-attachments (18a,b,c,d) on it each fitting through a cavity (16a,b,c,d) in one of the bodies.
