Abstract (en)
[origin: US2002069608A1] In an articulated-arm awning comprising articulated arms that are supported via wall holders and the free outer end of which is connected in an articulated fashion to a drop-out profile, provision is made for the drop-out profile, as seen in the cross-section, to be designed as a U-profile that is open towards the wall holders and which, in the retracted position, largely encompasses the folded articulated arms.
