Abstract (en)
[origin: EP1215360A1] The outer (2) and inner (3) profiled sections are joined by at least two insulating elements (4,5) between which is a hollow cavity (6). One end of each insulating element has a fixture-foot (7,8) for attachment to the outer profiled section and the opposite end's fixture foot is for attachment to the inner profiled section. The hollow cavity contains at least one insulating diagonal element (9) at least one end (10) of which is fixed aslant to one of the insulating elements..
