Abstract (en)
[origin: WO0122839A1] The invention relates to a tobacco pouch (1) provided with a front wall (2) and a back wall (4) manufactured from plastic film and with a flap (6) attached to the back wall (4). The tobacco pouch is further provided with connecting means for closing off the tobacco pouch by releasably connecting the flap to the front wall. The connecting means comprise a first part (12) which is connected to the flap (6) and a second part (14) which is connected to the front wall (2). One of the two parts is provided with hooks (18) which can be releasably fastened to co-operating means provided on the other of the two parts. The first and second parts (12, 14) consist of a strip-shaped area, the lengthwise direction (16, 22) of one of which is at least substantially directed parallel to the side edge (8) when the flap (6) is connected to the front wall (2).
