Abstract (en)
[origin: WO0123661A1] The present invention relates to a manufacturing process for providing fabric with an enhanced fabric benefit, said process comprising the steps of contacting fabric with a composition in the form of an aqueous emulsion, said composition comprising: (a) from about 0.1 % to about 20 % by weight, of a fabric modifying compound having formula (I) wherein R is a backbone linking unit; each R<1> is independently (i) a fabric reactive moiety; (ii) a fabric non-reactive moiety; (iii) a fabric conditioning moiety; (iv) s-triazine units having formula (II); (v) pyrimidine units having formula (III); (vi) cyclotriphosphazene units having formula (IV); (vii) and mixtures thereof; wherein R<2> is R<1> or a unit selected from the group consisting of hydrogen, C1-C22 alkyl, phenyl, benzyl, and mixtures thereof; X is -N-, -CH-, and mixtures thereof; the index m is from 0 to 5, the index n is from 0 to 5; (b) from about 0.01 % to about 10 % by weight, of a surfactant; and (c) the balance carriers and other adjunct ingredients.
