Abstract (en)

[origin: WO0119162A1] A riding lawn mower having zero turn capabilities has the engine (24) mounted on the front (14) of the frame (12). A drive system includes first and second hydrostatic transmissions for use in driving the back wheels. A grass bag (42) may be mounted to the back portion of the frame and provides a counter balance to maximize the weight distribution. A discharge chute (40) transfers cut vegetation from a mower deck (26) to the grass bag and provides rear center discharge.
