Abstract (en)
[origin: EP1088770A1] Spout (1) for containers of carton comprising a body (2) with an orifice (10), a removable membrane (4), sealing off the orifice (10), connected to the body (2) by a predetermined breaking line (5) and a tear off handle (3) integrally connected to the membrane (4) by a connecting element (9). The tear of handle (3) may stand taller than the upper rim (15) of the orifice (10) of the spout (1). A lever mechanism helps to reduce the initial opening force to remove the membrane (4). <IMAGE>
