Abstract (en)
[origin: EP1219209A1] This consists of a single-part leg for children's camp-type bed provided with a leg (1) placed on a central body (2) which holds a top part (3). It has holes (14) for housing tubes (16) holding a mesh (17). The upper and central parts have an extension (12) for supporting the mesh (17). The top part has a recess in its external angle essentially identical to that of the leg which rests on a corresponding surface when a set of beds is piled up. For application in making stackable beds. <IMAGE>
