Abstract (en)

A container, such as a bag or pouch (10), for containing a liquid or pasty material comprises first and second opposite sidewalls (12, 13), which may be made from flexible sheet material. An open pocket (17) is formed on the outer side surface of the first sidewall (12). A holder (11) for the bag or pouch (10) forms a housing having a pair of spaced front and rear walls (20, 21) for receiving the bag or pouch there between, and the front wall (20) of the housing has an upper free end adapted to be received in the pocket (17) of the bag or pouch (10) when the bag is arranged in the holder. Illustrative, advertising and/or informative matter may be printed on or otherwise applied to the front surface (15) of the pocket. <IMAGE>
