Abstract (en)
[origin: EP1220373A2] The device has a housing (1) in which a central conductor (7) sits and with a tubular connector stub (2) on the cable end with an external thread and an inner cone (4). A clamping sleeve (5) with a deformable cone (14) that sits on the outer conductor of the semi-stiff coaxial conductor can be compressed by a cap nut (6) that can be screwed onto the outer thread of the tubular connector stub.
