Abstract (en)

[origin: WO0108986A1] The invention relates to a box for packing tablets, spray bottles and similar and comprises a front side (1) and a rear side (2), two narrower edge sides (9, 14) and a bottom side (11) and also an upper lid side (17) which can be folded forwards and constitutes an extension of the rear side (2). The invention is characterized by an inner lid constituting an extension of the front side (1) by means of an inwardly directed edge side (3) from the upper end of the front side (1) with an opening (4) for removal of the contents, which edge side (3) can be folded when it meets the rear side (2) and, with a length at least corresponding to the thickness of the box, is fastened to the rear side lid (17) and then folded forwards through an angle of 90 DEG both on the sides and along the rear side fastening, constituting the inner lid which can be opened and closed together with the outer rear side lid (17). The invention also comprises a method for manufacturing the boxes.
