Abstract (en)

The water fog generator for fighting tunnel fires is mounted on a rescue vehicle for fire fighting to form a screen of fog jets to dampen smoke and flames in a tunnel. The jets create a one hundred and eighty degree screen to counter the effects of fire. It has a semi-circular shaped tank from which telescopic tubes extend to carry the fog jet nozzles. The tank is connected to as pressurized fluid source.

Abstract (fr)

Dispositif générateur de brouillard destiné notamment à équiper les véhicules de lutte contre les incendies dans les tunnels, grâce à la création d'un écran constitué par des jets de brouillard.
