Abstract (en)

System includes main pipelines extending along length of tunnel, secondary pipelines (3), derived from main pipelines (2), automatic (7), pyrotechnic (13) or manual (6) valves. Water nozzles (4) are placed along secondary pipelines, and spread water over fire doors (19) and wall (23) separating refuge island (18) from tunnel. Different water nozzles (24, 25) are used to permanently fill in safety lock (17), and to spray water mist inside refuge islands where people are gathered.

Abstract (fr)

Dispositif efficace et économique mettant en oeuvre du brouillard d'eau destiné à la protection des refuges et abris, notamment de tunnels, routiers, ferroviaires et maritimes contre les effets d'un incendie et des émanations toxiques. <IMAGE>
