Abstract (en)
[origin: EP1221410A2] Device for packing objects in bags (10) comprises a rotating slide (3, 4) for the objects, a packing cassette (5) receiving and guiding an object to be packed and moved backward and forward in the conveying direction from a feed position to a transfer position, a bag station arranged in the path of the packing cassette, and a transfer cassette (6) receiving a packed object and arranged so that it moves backward and forward between a receiving position and a sealing position. An Independent claim is also included for a method for packing objects in bags. Preferred Features: The packing cassette is arranged so that in its feed position the slide can slide the object inside.
