Abstract (en)

[origin: DE10100199C1] The sheet securing and guidance process involves passing the roller blind over the sheet stack (4), at the same time running the front and rear stack guides (11, 12) to working position (B) to secure the top sheet (3). The stack is then lowered as the top sheet is secured and guided on the stack. The stack guides are withdrawn to the parking position (A). An empty pallet is inserted and raised and the roller blind is withdrawn.
