Abstract (en)

[origin: DE10054900A1] Sliding mortar-applying carriage (1) for applying a thin layer of mortar (2) to one side of several adjacent stones (3), especially vertically perforated stones, is moved in a direction (s) over the stones and comprises a filling opening (5), a revolving conveyor belt (6) and a discharge opening (4). The discharge opening is limited below by the conveyor belt and above by a device adjusting the thickness of the mortar layer. Preferred Features: A taut wire (8) is arranged behind the discharge opening in the direction of travel to remove the mortar layer from the conveyor belt.
