Abstract (en)
[origin: EP1221742A2] The device has a screened sleeve (7) connected to the housing wall to make a ground connection, a central pin (13) carrying the transmission signal and for connection to an evaluation device and a coupling part (2) that corresponds to a counter part of a socket. The screened sleeve is directly connected to metal base plate (1) for connection to the housing wall and the coupling part is held between the sleeve and base plate.
