Abstract (en)  
[origin: DE19950884A1] The package for two liquids (2, 3) which are mixed before use consists of a bottle (7) containing the first liquid and a screw cap (6) fitted on to it with a pot (10) inside containing the second liquid. The bottom of the pot is sealed by a sheet of foil (11) and the bottle is sealed by a cup-shaped stopper (13). A pin (22) at the center of this pierces the foil when the cap is screwed more tightly on to the bottle. The stopper has a sloping floor and has a line of weakness (18) in the deepest area (17) which is ruptured at the same time.
