Abstract (en)

[origin: WO0127402A1] The present invention relates to an arrangement (1) for a building (2) made of sheet metal which is bent in a single piece comprising walls (3, 4) and a roof (5). In accordance with the invention, the lower edge section (3A, 4A) of the respective wall section (3, 4) is held secured to the upward-facing wall accommodating opening (7) in a profile rail (6). The opposite end (9) of the profile rail is executed in such a way as to be retained in its intended erection position (10).
