Abstract (en)
[origin: EP1223297A2] Slat (1), especially for incorporating in a register used for shading buildings, comprises a profile (2) made of an extruded first material, preferably aluminum, having on at least one side an insertion element (10) made of a second material different to the first material. Preferred Features: The insertion element is plate-shaped and is adapted to the outer contour of the profile. The insertion element has a light-reflecting surface or a light-absorbing surface.
