Abstract (en)
[origin: DE10101246C1] The combustion chamber door (13) is subjected to restoring torque for automatic closure and is swivel mounted in a combustion chamber housing (1). A locking shaft (21) has locking catches gripping behind U-shaped elements on the combustion chamber door. In a locked position, the closed combustion chamber door is locked to the housing. In an open position the lock is released by a release-lever (27) on the locking shaft.
