Abstract (en)

[origin: EP1223589A2] Electrical line comprises an electrical conductor and an insulating layer surrounding the conductor. The conductor consists of a number of wire bundles made from a central metal core wire and copper wires surrounding the core wire. Preferred Features: The core wire is made from a steel having a strength of at least 1500 N/mm², preferably made from a chromium-nickel steel having a strength of more than 1700 N/mm².
