Abstract (en)

[origin: FR2799730A1] The invention relates to a packaging machine for filling and sealing containers, comprising a plurality of units for performing designated packaging operations using packaging means (21-29), said units comprising at least one filling unit (21) and a sealing unit (23, 24, 27). The inventive machine also comprises transport means (10) for passing the containers through a circuit including the various units. The invention is characterised in that the units are arranged in an airless housing (2).
