Abstract (en)
[origin: WO0132817A1] The invention relates to the use of the K20 cellulase obtained from Melanocarpus sp. or Myriococcum sp. or a cellulase that is by 80 % homologous to said cellulase as a graying inhibitor in detergents and cleaning agents. Said cellulase, especially when combined with an optionally genetically modified protease and/or alkali percarbonate reduces the redeposition of dirt particles on washed laundry.
