Abstract (en)
[origin: WO0127526A1] The invention relates to a motor vehicle headlight, comprising a housing (1) with a light outlet (2), a translucent cover panel (3) which covers the light outlet (2) and at least one illumination element (5) which is located in the housing (1). According to the invention, in order to reduce the glare for the driver from light which is reflected upwards, anti-reflection coatings and/or light absorbing elements and/or polarising elements (9) are provided on the cover panel (3) and/or on the interior of the headlight.
