Abstract (en)
[origin: EP1224882A1] Specifically designed for products comprising two parts which couple to each other, particularly safety buckles such as those used in handbags, backpacks and the like, in which a male element is inserted in a female element, consisting of using parts with contrasting colours and in providing the enveloping part (1) with slits or orifices (3) which represent the mark, logo or message to be conveyed, so that when the male part (2) is housed inside female part (1) said male part (2) closes the base of slits (3) and creates a clear colour contrast with the remaining surface of enveloping part (1). <IMAGE>
