Abstract (en)

This machine consists of a shredding box (2) with independent motors (4) for two inversely rotating cutting rollers (8), which drive a central part (14) generating two different cutting edges. <??>The central part can be moved when a force greater than the established level is applied to it, by the insertion of a metal bar or similar item. <??>The machine has means for removing the shredded product, and means for disconnection when there is any obstruction or any of its inspection panels or parts is opened. <??>For industrial application in the manufacturing of machinery for shredding wood and other materials. <IMAGE>
