Abstract (en)
An adjustable wrench includes an elongated wrench body, the wrench body having a fixed jaw at one end thereof, a movable jaw coupled to the wrench body and moved relative to the fixed jaw, the movable jaw having a rack at one side thereof, a worm mounted in the wrench body and engaged with the rack of the movable jaw for rotation by hand to move the movable jaw relative to the fixed jaw, a elastic member mounted in the wrench body and supported between the movable jaw and the wrench body to force the movable jaw in direction apart from the fixed jaw for forcing the teeth of the rack of the movable jaw to attach on the teeth of the worm. <IMAGE>
