Abstract (en)

A centrifuge for draining washed egg trays comprises a centrifuge chamber in a housing (9). A bottom (8) for receiving a washed stack (7) of egg trays in a feeding position is displaceable with respect to said housing (9) between the feeding position and a centrifuging position. The stack (7) of egg trays is centred on the bottom in the centrifuging position, and in this position the bottom is in engagement with a rotational drive (22, 23), which is vertically non-displaceable with respect to the housing.
