Abstract (en)

[origin: WO0132049A1] The invention concerns an accessory for a depilatory appliance comprising a housing (21) containing an electric motor driving actuating means in a cyclic movement for closing/opening at least a squeezing device (24, 24') designed to pull out hairs from the skin, said accessory comprising means to be fixed to said housing, and at least a mobile part (4) designed to be urged into contact with the skin during use, as said mobile part of the accessory produces skin-planing by being actuated by driving means capable of actuating simultaneously the squeezing device(s) (24, 24').
