Abstract (en)
[origin: WO0132523A1] (202). The invention concerns a spill-proof pourer (1) comprising a skirt (2) bearing on its outer surface a means for sealed fixing to said neck, and at the so-called top end (22) of said skirt, a flared top part (21). In said pourer, the type and thickness of the material constituting at least said emerging part (210) are selected so that the flared top part (21) is flexible and can be pressed against the widemouthed part of the neck. The skirt (2) may include a flexible peripheral ring (202).
