Abstract (en)

[origin: WO0132708A1] The present invention relates to a novel synthesised peptide-analogue, including the functional domain of the Wnt-5a protein, a composition comprising the synthesised peptide-analogue, an antibody used as a diagnostic agent. The present invention also relates to uses of the compound for the manufacture of a medicament or a diagnostic agent in the treatment of metastasis or the diagnosing of metastasis.
