Abstract (en)
[origin: WO0132714A1] This invention relates to a method for increasing the production of a protein in a cell and more particular by the production in a plant cell. This invention also relates to recombinant immune fusion complexes and more particularly to their expression in plants. Specific constructs comprising gp 120 fused to the heavy chain constant region of an antibody or part thereof are disclosed as well as the use of such constructs in generating an immune response.
