Abstract (en)
[origin: WO0132866A2] The present invention relates to chimeric receptor proteins, designated adaptor receptors, which use adaptor proteins as intracellular signalling components. By incorporating different adaptor proteins, optionally in conjunction with other cytoplasmic signalling sequences, as an intracellular signalling domain of an adaptor receptor, the level of intracellular signalling mediated by the adaptor receptor may be tailored as desired. Nucleic acids encoding adaptor receptors and adaptor receptor proteins, suitable for use in medicine, are described.
