Abstract (en)

[origin: WO0133517A1] The invention relates to locker arrangement for storing and depositing objects. The inventive arrangement has a plurality of cuboid compartments (12) which can be locked by a lockable flap (14) respectively and an operating and control unit comprising a control panel and a data processing unit (32) for administering the compartments (12) and for controlling the locking devices (70) for the respective flaps. Mobile, electric cooling boxes (36) are allocated to the compartments (12). Each compartment (12) is provided with an electric connection (52) which is connected to a current supply (34) and is used for supplying a cooling box (36) that can be slid into the compartment (12).
