Abstract (en)

[origin: EP1226776A2] Device for distributing and/or arranging parcels comprises a holder (14) fixed to a receiver in an authorized region of the receiver and a collecting device (16, 18) connected to the holder to receive and enclose a parcel and to form a closable and removable connection with the holder. The collecting device interacts with a first key unit which is connected to the receiver via a letterbox opening for seizing the object in the collecting device, and interacts with a second key unit which can open and remove the connection.
