Abstract (en)

[origin: DE10103902A1] The plug connector has a sleeve-type socket for a mast or other component, which can be adjusted by a joint part over an opening, into which the mast can be fixed. The joint part is positively connected to a holder in the opening. Preferably, the joint part has a spherical outer surface that lies against a counter surface in the holder, which has a peripheral depression for the joint part.
