Abstract (en)
An ink jet recording element comprising a support having thereon in order: I) a porous base layer comprising particles having a primary particle size of from 7 to 40 nm in diameter which may be aggregated up to 300 nm and which are dispersed in a binder; and II) a porous image-receiving layer comprising: (a) particles having a primary particle size of from 7 to 40 nm in diameter which may be aggregated up to 300 nm; and (b) water insoluble, cationic, polymeric particles comprising at least 20 mole percent of a cationic mordant moiety; the thickness of layer I) being between 35 and 50 μm and the thickness of layer II) being between 2 and 6 μm and printing method using same.
