Abstract (en)

[origin: EP1227195A1] Building (10) has a spherical shape provided with at least two decks (12, 14, 16) arranged a distance apart parallel to the equatorial plane. At least one of the decks is supported on the ground via at least one support construction (18). A tower-like stairs and lift housing is arranged on the side of the building with at least one access into the building at the height of a deck. Preferred Features: The lower building section is flat and supported on the ground. The spherical building is supported on the ground so that it is positioned a distance away from the ground. One deck (12) is arranged in the equatorial plane and at least one deck (14, 16) is arranged below the equatorial plane. The support construction is attached to the lower deck (14).
