Abstract (en)
[origin: US2002162761A1] A golf bag for receiving a plurality of golf clubs. The bag comprises a bag body (1) with a longitudinal axis (13), an inner chamber (11) and a lateral area (12) which essentially extends in the direction of the longitudinal axis (13). Holding devices (2) are arranged on or within the lateral area (12). The holding devices are used for receiving golf clubs (3) having club shafts (32) that essentially extend in the direction of the longitudinal axis (13). Golf clubs held in holding devices (2) are situated outside the inner chamber (11). A golf club (3) that is held in a holding device (2) is essentially covered on the side facing away from the inner chamber (11) by a self-closing cover (4). The bag body (1) is composed of two shells (16) and can be unfolded along a hinge axis (7) which extends essentially in parallel in relation to the longitudinal axis (13) thereof, whereby the inner chamber (11) thereof becomes accessible.
