Abstract (en)
[origin: WO0134488A1] The invention relates to a theft-protected tube with a tube body that is provided with an interior plastic layer (1). A blocking layer (3) is applied on the interior layer (1) and is intimately linked with said interior layer (1) by means of a bonding agent (2). A metal strip (6), which in the activated state triggers an alarm signal in a theft-detection device, is disposed on a support strip (7) that is glued onto the blocking layer (3). A plastic jacket layer (5) is disposed on the aluminum layer (3), said jacket layer being linked with the blocking layer (3) by means of another bonding agent (4).
