Abstract (en)
[origin: WO0130668A1] The invention concerns a fluid product dispenser comprising a dispensing member (3) two reservoirs (1, 2) separated by a partition (21). The invention is characterised in that displacing means (33) are provided to move the dispensing member (3) towards the partition (21) to cause it to collapse, thereby enabling the contents of the two reservoirs to be mixed before being dispensed.
