Abstract (en)  
[origin: DE19948417A1] The invention relates to 3-pyrrolo imidazole derivatives of general formula (I), wherein: the imidazole radical is an optionally substituted imidazole cycle; X, Y, A and B, independent of one another, represent carbon atoms or nitrogen atoms; radicals Z, independent of one another, represent a hydrogen atom, a halogen atom, a pseudohalogen, an optionally substituted alkyl radical, alkenyl radical, alkynyl radical, aralkyl radical, aralkenyl radical, aralkynyl radical, cycloalkyl radical, cycloalkenyl radical, cycloalkynyl radical, cycloaralkyl radical, cycloaralkenyl radical, cycloaralkynyl radical, aryl radical, alkoxy radical or an optionally substituted ring, on which one or two additional optionally substituted rings can be anellated, and/or at least two of the radicals Z can be part of an optionally substituted ring, on which one or two additional optionally substituted rings can be anellated. The invention also relates to pharmaceutical compositions which contain at least one of the aforementioned compounds, optionally in conjunction with conventional supports and/or adjuvants and/or auxiliary agents.
