Abstract (en)

[origin: US2002117518A1] The present invention relates to a system for dispensing a product. The system may include a receptacle containing the product, a tilt-type valve on the receptacle, and a dispensing head for actuating the tilt-type valve and dispensing the product. The dispensing head may include at least one orifice for dispensing the product. The dispensing head and the tilt-type valve may be configured such that actuation of the tilt-type valve may be achieved only by applying a force on the tilt-type valve in a direction lateral to the tilt-type valve.
